

"How do we scale up Kautilya Fellowship, Kullhad Economy & Kullhad Economy Festival, across all colleges and universities in India?"

Details:

Kautilya fellowship is a flagship program that aims to bridge the gap between knowledge and development economics by offering the fellows an opportunity to work in sync with government, academic and corporate partners. The program offers the fellows a holistic experience that utilises their past and current education in the right setup and allows them to interact with impact centric projects, global leaders and academicians. The rigorous one year fellowship offers the fellows an opportunity to publish papers, articles and blogs along with attending conferences with celebrated academicians and scientists.
